Ambitious Frontend Engineer eager to join Klick's Applied AI team, leveraging skills in Generative AI and LLMs to create inclusive, transformative products that empower individuals and communities.

EXPERIENCE

ATS PASS AI

| Python | Multiagent | AI
Resume Automation Tool - January 2024 - Present

Led the development of an AI-driven project, integrating CrewAI to automate tailored resume creation for enhanced job search efficiency.

- Engineered a system that personalizes resumes using AI, achieving over 85% keyword alignment with job descriptions for optimal **ATS optimization.**
- Check out my code on Github! here

AI PATHFINDING

| Python | A* Algo
Game Development - September 2023 - December 2023

Developed an AI-driven game utilizing the A* algorithm to enhance user engagement and optimize system efficiency.

- Developed and implemented an AI-powered game utilizing the A* pathfinding algorithm to create intelligent and engaging gameplay, demonstrating feasibility assessment and problem-solving skills.
- See more about the project on Github
